

PEAK FUNCTIONS IN \mathbb{C} -CONVEX DOMAINS

WŁODZIMIERZ ZWONEK

In the lecture results on existence of different types of peak functions in classes of \mathbb{C} -convex domains are discussed. As one of tools used in this context is a result on preserving the regularity of \mathbb{C} -convex domains under projection.

Date: Talk given at Seminar on Complex Analysis, meeting 2203, 23 October 2017.
