

# Extension property

Łukasz Kosiński

Talk given at Seminar on Complex Analysis,  
meeting 2325, April 11th, 2022

If  $V$  is an analytic set in a pseudoconvex domain  $\Omega$ , we show there is always a pseudoconvex domain  $G \subseteq \Omega$  that contains  $V$  and has the property that every bounded holomorphic function on  $V$  extends to a bounded holomorphic function on  $G$  with the same norm. We study such a  $G$  for some particular analytic sets.
